CAELORAMUN 2026

OFFICIAL WEBSITE REQUIREMENTS

Website Specification & Functional Requirements

Conference	CaeloraMUN 2026
Conference Dates	13–15 November 2026
Organiser	Caelora Productions
Primary Registration Types	Delegates & International Press (IP)

1. Project Overview

The purpose of the website is to serve as the official digital platform for CaeloraMUN 2026.

The website must be designed as a complete registration and conference-management system rather than only an informational website.

2. Website Objectives

- Allow participants to register as Delegates or International Press.
- Support multiple registration rounds and corresponding pricing.
- Support both individual registrations and delegation registrations.
- Enable secure online payment through an integrated payment gateway.
- Automatically generate registration confirmations and registration IDs.
- Provide a central admin dashboard for managing registrations, payments, allocations and attendance.
- Generate unique QR codes for confirmed participants.
- Support QR-based conference check-in and attendance tracking.
- Provide downloadable/exportable registration data for the Secretariat.

3. Website Structure / Pages

The website should contain the following primary pages. FAQ and Sponsor/Partner sections are intentionally excluded.

Home — Conference introduction, key information, registration call-to-action, important announcements and links to major sections.

Registration — Delegate registration information and the Delegate Registration form.

International Press (IP) — International Press information and the IP registration form.

Contact Us — Official contact details and communication channels.

4. Committee Section

The website must include the following committees:

- UNHRC

- DISEC
- UNODC
- LOK SABHA
- TFI (Telugu Film Industry)
- International Press (IP)

Each committee should have its own dedicated information section/page where required.

- Committee name
- Committee description
- Agenda
- Background guide, where available
- Portfolio/allocation information, where applicable
- Relevant Executive Board information
- Any committee-specific instructions or downloadable resources

5. Delegate Registration System

The Delegate Registration form will be supplied separately and must be integrated into the website.

- Registration must also support delegation registration where applicable.
- Delegates must be able to indicate committee preferences.
- The system must clearly state that committee preferences are requests and do not guarantee allocation.
- Final committee allocation must remain under the control of the CaeloraMUN Secretariat.
- The system must support multiple registration rounds with different registration fees.
- Round 1 registration fee: ₹2,500.
- The website must allow later registration rounds and their respective fees to be configured by the administrator.
- The registration system must collect all fields contained in the official Delegate Registration form supplied by CaeloraMUN.
- The system must allow the Secretariat to view, verify and manage each registration.

5.1 Registration Terms & Conditions

The registration flow must incorporate the official CaeloraMUN Registration Terms & Conditions. Participants must actively acknowledge and accept the applicable terms before submitting the form.

- Mandatory acceptance checkbox for Registration Terms & Conditions.
- Link to the complete Registration Terms & Conditions before submission.
- Acknowledgement that registration information must be accurate and authentic.
- Acknowledgement that submission does not automatically guarantee acceptance.
- Acknowledgement that committee preferences do not guarantee allocation.
- Acknowledgement that final committee allocation is determined by the CaeloraMUN Secretariat.
- Acknowledgement that registrations are non-transferable.
- Acknowledgement of the applicable cancellation and refund provisions.
- Acceptance of the Code of Conduct and applicable Rules of Procedure.
- Consent regarding conference photography, videography, audio recording and related media use.
- Where applicable, parent/guardian consent for participants below 18.
- Declaration regarding truthful information and non-fraudulent payment.
  A separate pdf regarding Terms and Condition will be sent.

6. International Press (IP) Registration System

The official IP Registration form will be supplied separately and must be integrated into the website. The IP registration is a paid registration and must use the same secure payment and confirmation infrastructure.

- Dedicated IP registration page.
- Dedicated IP registration form using the official form supplied by CaeloraMUN.
- Paid registration workflow.
- Payment gateway integration.
- Automatic registration ID generation.
- Automatic confirmation after successful registration/payment.
- IP registrations must be separately identifiable from Delegate registrations in the admin dashboard.
- IP applicants must be subject to the applicable Registration Terms & Conditions and declarations.

7. Payment Gateway

The website should support an integrated payment gateway so that participants can complete registration and payment directly through the website.

- Payment gateway integration for Delegate registrations.
- Payment gateway integration for IP registrations.
- Configurable registration fee by registration round.
- Support for successful, failed, pending and cancelled payment states.
- Payment transaction/reference ID stored against the registration.
- Automatic confirmation after successful payment.
- Admin visibility of payment status.
- Ability to reconcile registrations with payment records.
- Payment gateway should be selected and implemented in consultation with CaeloraMUN.

8. Automated Confirmation & Communication

- Automatic confirmation email after successful registration/payment.
- Automatic WhatsApp confirmation where technically and legally supported through an approved WhatsApp integration.
- Registration ID must be included in confirmation communication.
- Payment confirmation details should be included where applicable.
- QR code should be provided to the participant once the registration is confirmed.
- The system should allow administrators to send emails to selected participants or groups.
- Templates for registration confirmation, payment confirmation and relevant participant communications should be configurable.

9. Admin / Backend Dashboard

The website must provide a secure administrator dashboard with comprehensive registration-management functionality.

- Total registrations dashboard.
- Paid/unpaid/pending registration overview.
- Separate Delegate and IP databases.
- Committee-wise registration breakdown.

- Payment status tracking.
- Search registrations.
- Filter registrations by relevant fields.
- View complete individual registration records.
- Export registration data to Excel/CSV. [VERY IMPORTANT]
- Unique registration ID for each participant.
- Approve/reject applications.
- Assign committees.
- Assign portfolios.
- Edit allocation information where authorised.
- Send emails to individual participants or selected groups.
- View payment transaction/reference information.
- View registration timestamps and relevant status history.
- Manage registration rounds and registration pricing.
- Manage confirmed, pending, rejected and cancelled registrations.
- Manage QR/check-in status.
- View attendance/check-in data.
- Provide appropriate admin access controls and authentication.

10. QR Code & Conference Check-in System

Every confirmed Delegate and IP participant should receive a unique QR code connected to their registration record.

- Unique QR code generated for every confirmed participant.
- QR code associated with the participant's registration ID.
- QR code delivered through confirmation communication.
- QR scanning at the conference registration desk.
- Check-in status updated automatically after successful scan.
- Attendance tracking.
- Check-in/check-out capability.
- Admin dashboard showing checked-in and non-checked-in participants.
- Protection against duplicate or invalid scans.
- Ability for authorised staff to manually update attendance where necessary.

11. Personal Information & Data Handling

The registration system must collect and process participant information only for legitimate conference-related purposes and must restrict access to authorised personnel.

- Registration data must be accessible only to authorised administrators.
- The system should collect only information required by the official registration forms.
- Participant data should be stored securely.
- The admin panel must use authenticated access.
- Payment information and transaction references must be handled securely.
- The website should follow applicable data-protection and payment-security requirements.

12. Contact & Communication

- Official CaeloraMUN contact details.
- Registration-related contact information.
- IP-related contact information where applicable.
- Official social media links where applicable.
- Clear route for participants to contact the organising team regarding registration/payment issues.

13. Technical & Operational Requirements

- Responsive website suitable for desktop, tablet and mobile devices.
- Secure HTTPS connection.
- Secure administrator login.
- Reliable database for registrations and participant records.
- Payment gateway integration.
- Email automation.
- QR generation and scanning functionality.
- Excel/CSV export functionality.
- Database backup and recovery capability.
- Error handling for failed registrations and payments.
- Scalable architecture capable of handling a large number of simultaneous registration attempts.

14. Registration Workflow

1. Participant opens the appropriate Delegate or IP registration page.
2. Participant completes the official registration form.
3. Participant reviews and accepts the applicable Terms & Conditions and declarations.
4. Participant proceeds to payment.
5. Payment gateway processes the transaction.
6. The system records the payment result and transaction/reference ID.
7. Upon successful payment, the system generates a unique registration ID.
8. The system generates the participant's unique QR code.
9. Confirmation is sent by email.
10. Registration appears in the admin dashboard.
11. Secretariat reviews and manages the application.
12. Committee/portfolio allocation is assigned by authorised Secretariat personnel where applicable.
13. Participant information and allocation can be managed through the backend.
14. At the conference, the participant's QR code is scanned for check-in.
